Braille CapTel: For People who are DeafBlind and Voice for Themselves

CapTel 880iB

Read braille captions of telephone conversations on your dynamic braille display. Easy to connect using Bluetooth or USB.

Photo description: a white, corded phone with a screen. On the screen, the message reads, "calling to confirm your appointment"

Mobile Braille Capability

Users can make/receive calls on a mobile device, such as an iPhone, then read braille captions of the conversation using Braille WebCapTel. Portable, no wires, convenient. Works with any dynamic braille display.

Photo description: a black cell phone. On the phone's screen, the message reads, "this is metro taxi service calling to confirm we will be there at 3:00 to pick you up yes we can ring the doorbell when we arrive"

Photo description: a black braille display. The braille message reads, "thanks for calling Circle Taxi"

How It Works

The hearing caller talks to CapTel user directly.

Step 1: The hearing caller talks to the CapTel user directly.

Step 2: The CapTel Captioning Service transcribes everything they say into captions.

Step 3: Captions appear on the CapTel phone, and the individual who is DeafBlind can read the captions

Step 4: on the dynamic braille display

Step 5: The CapTel user responds by voice, and the caller hears the spoken voice

Low Vision Solutions

Large Display Captions

For People with Both Hearing and Vision Loss

CapTel IP captioning service enables people who are deaf or hard of hearing to communicate over the phone by providing captions of the conversation. These extra-large display options are designed for individuals who have difficulty viewing standard-sized captions.

CapTel 880i

The large display screen and extra-large font sizes are designed for individuals with low vision. Variable font sizes and colors let you customize the captions to a style that is easiest to read. (photo of this phone)

CapTel 2400i

The built-in display features extra-large font sizes and bright, touch-screen display for easy navigation through options, includes dial-by-picture capability to simplify dialing for people with vision loss.

Requirements:

Telephone service

High-speed internet access

DeafBlind Agencies

iCanConnect (National DeafBlind Equipment Distribution Program: NDBEDP_

Helen Keller National Center

Perkins School for the Blind

We are working with these agencies as helper/installers

Slide 9

Questions and Answers

Q. Do you have a list of agencies where I can get a CapTel 880iB?

A. A list of ICC agencies is provided on the CapTel.com/braille website.

Slide 10

Questions and Answers

Q. Where can I get a CapTel 880iB?

A. Users can get it through NDBEDP (iCanConnect) or other agencies that support DeafBlind users. The 880i is not sold on our website, at stores or directly to customers. This is a specialized product.

Slide 11

Questions and Answers

Q. Does a Braille display come with the CapTel 880iB?

A. No. The customer will use their own or will have to get one through their supplier.

NOTE: A list of compatible Braille displays and a support video are listed on the website:
